TITLE : STACKED AIR BATTERY

ABSTRACT : **PURPOSE:** To prevent the expansion of a packaging body caused by hydrogen gas generated from button type air batteries by holding a substance adsorbing or absorbing hydrogen in a space except for batteries within a battery housing of a resin case.

CONSTITUTION: A stacked air battery 7 is formed by accommodating a plurality of button type air batteries 3 stacked and connected in series in a resin case 4. A substance 9 adsorbing or absorbing hydrogen is held in a space except for batteries within a battery housing of the resin case 4. Preferably, the substance 9 adsorbing or absorbing hydrogen is attached and held to a leaked electrolyte absorbing material.
